

REMARKS

In the Office Action of July 11, 2007, the Examiner rejected all claims of the application under 35 U.S.C. §112 as failing to comply with the written description requirement. The Examiner stated that the claim language was not consistent with the specification and drawings and required correction of the claim language. No claims are allowed.

Applicants have carefully reviewed the rejected claims and herein make numerous amendments thereto. Specifically, the objections raised by the Examiner are addressed, in both the amended claims and the newly-filed claims, as follows:

The references to the objected-to phrase "a protocol" have been removed and the claims now specify a decoding step, carried out in the mobile communication device, using an algorithm.

All claims now specify a converting step, which is clearly carried out before the graphic is read by the mobile communication device.

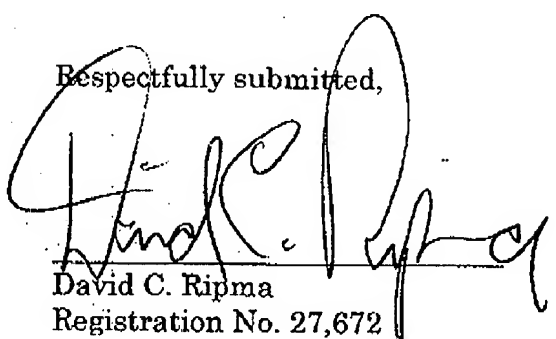

The steps of reading the graphics, decoding using the algorithm, and storing data, are all clearly carried out in the mobile communication device.

Applicants respectfully submit that the claims amended herein, and new claims 17-20, respond fully to the Examiner's §112 objections and are allowable.

In view of the foregoing, applicants respectfully request reconsideration of the application, as amended, and request that it be passed to issue.

Date: 10/11/07

Respectfully submitted,

David C. Ripma
